GOVERNMENT PRINTING OFFICE  
WASHINGTON : 1936

SPECIAL ADMINISTRATIVE LIST  
OF PUBLICATIONS

The economy restrictions imposed on the free distribution of Department of Agriculture publications in recent years have naturally reduced the number of requests for them. An inventory of the publication stock of the Department now reveals a moderate supply on hand of publications issued prior to 1935. As these may be of value to the personnel of the bureaus of the Department, to officials, staffs, and instructors of the State agricultural colleges, experiment stations, and extension services, and to libraries and other institutions, this list has been prepared for their information and use. If any of the publications listed are desired, the Department will be glad to send them. Instructors may also request copies for their students. All requests will be filled in the order of receipt as long as the supply lasts.

If any copies remain on hand after the groups mentioned have had opportunity to satisfy their needs, the stock will then be made available to specialized and other groups of the general public.

If you wish to obtain copies, please write your name and address plainly on the frank at the bottom of the last page, indicate in the column provided the number of copies of each publication you want, and return the list to

U. S. Department of Agriculture  
Office of Information  
Division of Publications  
Washington, D. C.

This list will be returned with the publications you select. If you do not receive all of the copies you request, you will know in that way that the available supply became depleted before your order was reached.

## CIRCULARS

Publication no.	Title	Number of copies desired
